ACCESS CONTROL

Integration Starts Here!

RESTRICTING ENTRY WITHOUT RESTRICTING OCCUPANTS

APPLICATIONS

- BANKS AND FINANCIAL INSTITUTIONS
- AIRPORTS AND TRANSIT SYSTEMS
- UTILITIES AND RESOURCES
- EDUCATIONAL FACILITIES
- HEALTHCARE FACILITIES
- MULTI-TENANT BUILDINGS
- APARTMENT/CONDOMINIUMS
- RETAIL STORES

From a single door system to control of multiple facilities, Guardall offers a full selection of industry-leading access control solutions for any commercial, institutional or industrial application – custom designed for your specific requirements. Guardall also offers exclusive product solutions for many specialized high risk security needs. Just as importantly, Guardall access control systems are designed to grow as your needs change without discarding your original investment.

UP TO 64,000 CARDHOLDERS – The modular design of Guardall access control systems makes expanding the number of users fast, easy and affordable.

FROM 16 TO 8,000 DOORS – A single Guardall access control system can be easily expanded using modular door controllers that provide distributed processing and redundancy.

MULTIPLE READER TECHNOLOGIES – Use the reader that is right for each secure point of your facility. Guardall offers a full array of readers and cards including MIFARE® smartcards, keypads, proximity card readers, wireless tokens and transmitters.

VISITOR AND HIGH SECURITY TRACKING – Guardall makes it easy to define access to each door, area or floor of your facility and can provide you with alerts and an audit trail for each visitor.

Sophisticated access control with the assurance of Guardall quality, reliability and easy expandability in the future!

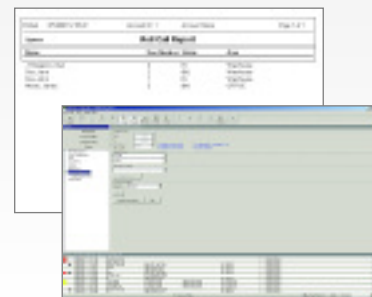

INTEGRATED ELEVATOR CONTROL

Guardall access control reader technology can be built into elevator car control systems to provide seamless high security integration. A full range of controller, filter/isolation and relay modules are available to meet the specifications of most installations.

IP NETWORK CONTROL AND REPORTING OPTION

Guardall access control systems offer the option of IP network modules and software that allow you to program, control, and receive activity reports from anywhere in your facility or at a remote location.

SMART CARDS

MIFARE® contactless smart cards delivers up to 16 applications on a single card.

SELECT THE LEVEL OF SECURITY THAT IS RIGHT FOR YOU

Guardall access control systems encompass a wide range of advanced technology including proximity card readers, MIFARE® contactless smart card readers, network software control and anti-skimming card readers specifically designed for the banking industry.

PHOTO-BADGING

Guardall Director software integrates with photo-badging card printers that allows high quality ID badges to be produced easily.

'TRUE' INTEGRATION

Every Guardall access control system is designed to be instantly expandable and fully integrated with intrusion alarm and digital video systems at any time in the future!
