# MANAGEMENT & CONTROL

**Integration Starts Here!**

## 'TRUE' SYSTEMS INTEGRATION FOR ANY FACILITY

Guardall Director management & control software takes the high cost, complex installation and lengthy staff training out of 'true' systems integration – while also providing your facility or organization with a powerful management tool with the built-in flexibility to meet your unique security requirements.

**MONITORING AND CONTROL** – Guardall Director supports multi-level operator authorization with customized visual monitoring screens (including toolbar navigation) and selectable sorting/filtering of system information.

**MANAGEMENT REPORTS** – Guardall Director gives you maximum flexibility for data capture, display and audit reporting, for both local sites and networked sites managed remotely.

**SYSTEM DIAGNOSTICS** – Guardall Director features advanced system diagnostics, by panel or system, for both local sites and networked sites managed remotely.

**EVENT/ALARM NOTIFICATION** – Guardall Director offers a complete security monitoring and emergency response platform, including mobile notifications and capture of event resolution data.

**DIGITAL VIDEO INTEGRATION** – Guardall Director enables easy integration with our digital video products that allows display of live video, video triggered by an intrusion or access event, as well as linkage of historic events to recorded video.

### APPLICATIONS

- BANKS AND FINANCIAL INSTITUTIONS
- AIRPORTS AND TRANSIT SYSTEMS
- UTILITIES AND RESOURCES
- EDUCATIONAL FACILITIES
- HEALTHCARE FACILITIES
- MULTI-TENANT BUILDINGS
- APARTMENT/CONDOMINIUMS
- RETAIL STORES

### REMOTE SYSTEM DIAGNOSTICS

Ensuring the integrity of your security systems is our goal, so Guardall supports a comprehensive foundation of supervision for local and remote systems. So sophisticated, it can even alert you to service requirements before you experience an equipment failure.

### INFORMATION SYSTEM COMPATIBILITY

Although Guardall Director software is designed to make systems integration easier, it also supports the sophisticated requirements of SQL Server and Enterprise Resource Management systems, including the requirements for importing of user information from HR database systems.

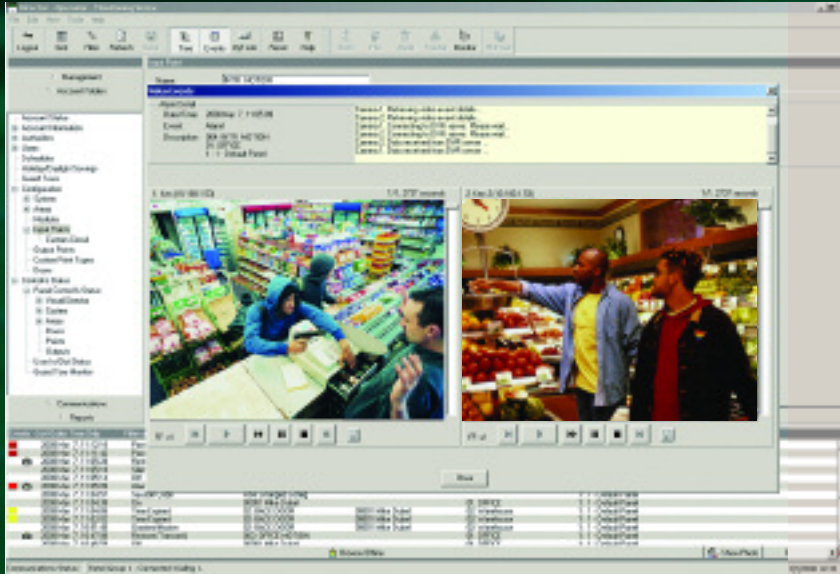

## INTEGRATION FOR TODAY AND TOMORROW

Guardall Director software offers an affordable and flexible solution for the management of integrated intrusion, access control and digital video systems. Best of all, Guardall Director expands to accommodate your needs as your requirements grow.

Remote viewing and control of local intrusion, access or digital video systems.

Integrated management control of multiple systems at a single site.

Central control and management of a network of integrated sites.

## THE RIGHT SYSTEM SOLUTION

Guardall systems integration is built on a complete array of advanced systems, components and devices that deliver excellent performance, features and value. We combine modular expandability with the power of sophisticated software integration to be able to offer a complete security solution that is tailor-made for your unique requirements – now and in the future.
